

TECHNICAL DATA SHEET

MIST FL

Mist FL is a specially formulated product for use in hard chrome plating systems for eliminating chromic acid fumes.

Mist FL is a low foaming product and it reduces surface tension in hard chromium baths. Considerable savings are achieved due to same and the treatment costs are also reduced.

MAKE-UP AND REPLENISHMENT :

Mist FL liquid is required to be added initially around 2-3 ml/lit depending on the requirements.

The replenishment of Mist FL can be controlled by visually checking the foam prevalent on chrome plating solutions and if needed is added in small doses.
